

Annual Health Screen

Our veterinarians recommend an Annual Health Screen as part of your pet's annual Wellness Visit. We will give your pet a thorough physical examination during their annual vaccination visit, but not all problems can be detected through physical examination alone. The Annual Health Screen allows our veterinarians to determine the overall physical health of your pet more conclusively.

Our physical examination will help alert you to potential problems which may occur in the future. The physical examination, however, does not allow us to determine the health of the internal organs, We need to ensure the liver, kidneys, and other vital organs are functioning properly as well. The best way to evaluate the function of the vital organs is through an Annual Health Screen, this short procedure will detect liver and kidney problems and several other diseases.

The Annual Health Screen also allows us to examine your pet for problems that may be breed-specific. That simply means that certain cats and dogs are pre-disposed to certain health problems.

Our veterinarians recommend the Annual Health Screen for all pets 2-7 years of age. As in all health evaluations, early detection is key. It allows our veterinarians a larger variety of effective treatment options for your pet. The cost of the Annual Health Screen is \$72.00, but the benefit to your pet is priceless.

We strive to make our Pet Care Program as affordable as possible. We know how much you love your pets and enjoy their friendship, therefore we hope to keep you and your pet together for as many years as possible. Thank you for entrusting your pet's health to Chase Animal Hospital.

_____ Yes, please complete the Annual Health Screen at this time.

_____ No, I wish to decline the Annual Health Screen at this time.
