

## **Senior Pet Evaluation**

As pets age we know that they, like people, have a greater risk for developing certain diseases and conditions. For example, we know that the incidence of problems such as heart disease, kidney disease, arthritis, and oral and dental disease increases with advancing age. However, when such diseases are diagnosed in their early stages, treatments to cure or manage such disorders are available in most cases.

For that reason, our veterinarians highly recommend that all patients that are seven years of age or older have a Senior Pet Evaluation completed annually. This Senior Pet Evaluation includes a complete blood count, blood chemistry profile, urinalysis, and thyroid test. As in all health evaluations, early detection is key; it allows our veterinarians a larger variety of effective treatment options for your pet. The cost of the Senior Pet Evaluation is \$163.50, but the benefit to your pet is priceless.

We strive to make our Senior Pet Care Program as affordable as possible. We know how difficult it is to say goodbye to an old friend, therefore, we hope to keep you and your pet together for as many years as possible. Thank you for entrusting your pet's health to Chase Animal Hospital.

\_\_\_\_\_ Yes, please complete a Senior Pet Evaluation at this time.

\_\_\_\_\_ No, I wish to decline the Senior Pet Evaluation at this time.
